Detailed description

The Z21V student chair is a standard school chair designed with an emphasis on functionality and simplicity. Its frame is made of high-quality flat-oval steel profiles with a powder-coated finish. The metal structure is powder-coated in the timeless RAL 9006 (White aluminium) shade.

The chair can be adjusted in height using tools.

The seat and backrest are 8mm thick molded beech plywood with a clear lacquer finish. This surface is highly scratch-resistant, prolonging the chair's life even in everyday use.

The Z21V chair has plastic glides as standard to protect the floor and ensure stability. The glides are available without felt, but this component can be replaced with a felt version on request.

The chair is low maintenance and easy to clean, making it an ideal choice for school environments.

The product offers individual customization options, such as changing the frame, seat, and backrest color. Swatches of colors and other finishes are available to tailor the chair to specific requirements.

Maintenance

The metal and beech plywood surfaces can be maintained with common cleaning agents, with the exception of aggressive cleaners, detergents, polishes, and products containing granules and sand. Do not expose the chair to excessive moisture or running water or to temperatures above 90 °C.
