Detailed description

The workshop/laboratory stool with a fixed footrest is designed for working at a raised worktop. The standard height of the chair is 58 cm, but variants with a height of 48 cm or 68 cm are available on request to suit different types of worktops.

The seat is made of molded beech plywood and treated with a clear scratch-resistant varnish. For an additional fee, it can also be varnished in color.

The chair frame is made of steel tubes with a diameter of 20 mm and is surface-treated with powder coating in the standard neutral color RAL 9006 (white aluminum).

The chair is low-maintenance and easy to clean, making it an ideal choice for a school environment.

Maintenance

The metal and beech plywood surfaces can be maintained with common cleaning agents, with the exception of aggressive cleaners, detergents, polishes, and products containing granules and sand. Do not expose the chair to excessive moisture or running water or to temperatures above 90 °C.
