Detailed description

The Z90 chair is a versatile product used in school canteens, meeting rooms, or conference rooms.

The chair's very rigid four-legged base is made of steel tubes and is designed for stacking. The base is powder-coated as standard in a neutral shade of RAL 9006 (white aluminium).

The chair shell is made of molded 10 mm thick beech plywood. The plywood is painted as standard with a clear varnish that ensures scratch resistance and highlights the natural pattern of the beech plywood. According to demand, the shell can be equipped with durable CPL in various wood decors or UNI colors, or it can be upholstered.

The chair is low-maintenance and easy to clean.

Maintenance

The metal and beech plywood surfaces can be maintained with common cleaning agents, with the exception of aggressive cleaners, detergents, polishes, and products containing granules and sand. Do not expose the chair to excessive moisture or running water or to temperatures above 90 °C.
