

- **Durable construction**
- **Natural beech plywood**
- **Ergonomic seat shell**
- **Adjustable footrest**
- **Easy to use**
- **Low maintenance**

Parameters and available chair sizes

Size	Height steps	Shell
4v7 (510mm)	84 mm	3/4 medium
4v7 (510mm)	133 mm	3/4 medium
4v7 (510mm)	162 mm	3/4 medium
4v7 (510mm)	182 mm	3/4 medium

Dimensions: The overall dimensions and weight of the product vary according size.

Carrying capacity: MAX. 120 KG.

Stackability: Yes

Note: The chair is designed for a size 6 table. Height steps are calculated from the floor.

Standard chair design

Frame material:	Steel
Frame color:	RAL 9006
Seat shell material:	Beech plywood
Seat shell color:	Natural, Clear varnish
Glides:	Without felt
Footrest:	Aluminium, plastic

You can view or download the colour and accessory adjustment sheets from our website.

Detailed description

The modern Z82 chair is a versatile product, particularly suitable for classrooms where the year groups change regularly (e.g., language classrooms). The chair's design is complemented by an adjustable footrest, which increases ergonomic comfort for users of different heights.

The chair's frame is made of 22-mm-diameter steel tubes, which ensures high strength and stability. The steel elements are powder-coated in RAL 9006 (white aluminium).

The chair's shell is made from 10mm thick beech plywood, finished with a durable clear varnish. This finish not only protects the material but also enhances the wood's natural grain. Thanks to its ergonomic 3D shape, especially in the back's lumbar region, the shell provides exceptional comfort, which you will appreciate even after long periods of sitting. A cut-out is integrated into the top of the backrest for easy manipulation.

The adjustable footrest is made of an aluminum profile and is firmly attached to the chair structure using plastic end caps and metal pins. A sliding mechanism on the underside of the profile allows easy adjustment of the footrest height. The mechanism is designed to be easy for students to use.

Maintenance

The metal and beech plywood surfaces can be maintained with common cleaning agents, with the exception of aggressive cleaners, detergents, polishes, and products containing granules and sand. Do not expose the chair to excessive moisture or running water or to temperatures above 90 °C.
