Seat shell material:	Beech plywood
Seat shell color:	Natural, Clear varnish
Upholstery color:	Anthracite grey
Base:	Plastic
Base fitting:	Castors

You can view or download the color and accessory adjustment sheets from our website.

#### Detailed description

The Z85 chair is swivel and height-adjustable. Teachers will especially appreciate the chair, but it will also find practical application in professional classrooms.

The chair's shell is made of 10mm thick beech plywood coated with a durable clear varnish. This finish not only protects the material but also enhances the wood's natural grain. Thanks to the upholstered seat segment and the ergonomic 3D shaping, especially in the back's lumbar region, the shell provides exceptional comfort, which you will appreciate even when sitting for long periods. An integrated grip is at the top of the backrest for easy handling.

The chair is equipped with a standard plastic cross, which is fitted with castors. We offer an aluminum alternative to this base. It has a polished finish and, like the plastic one, can be equipped with hard floor castors or glides.

The chair is low maintenance and easy to clean, making it an ideal choice for school environments.

#### Maintenance

Surfaces can be maintained with common cleaning agents, with the exception of aggressive cleaners, detergents, polishes, and products containing granules and sand. Do not expose the chair to excessive moisture or running water or to temperatures above 90 °C.
