Detailed description

The universal square dining table measuring 80 × 80 cm is ideal for dining rooms, canteens, or social areas.

Thanks to its welded construction made of thick-walled steel profiles, it offers high stability and long service life. The frame has rectifying legs that allow you to level out uneven floors and ensure maximum comfort during use.

The table top is made of 18 mm thick laminated chipboard and has a durable 2 mm ABS edge that protects against mechanical damage and extends the table's life.

The table combines standard design, functionality, and durability, making it ideal for a wide range of interiors.

Maintenance

The metal surface and the tabletop surface can be maintained with common cleaning agents, except aggressive cleaners, detergents, polishes, and products containing granules and sand. Do not expose the product to excessive moisture, running water, or temperatures above 90 °C.
