Detailed description

The base of the chair is made from 22 mm steel tubing, ensuring excellent stability and strength. The surface of the steel parts is finished with a powder coating in the elegant neutral shade RAL 9006 (White Aluminium).

The shell of the chair is made from 10 mm thick beech plywood, treated with a durable transparent finish. This surface not only protects the material but also highlights the natural wood grain. Thanks to the ergonomic 3D shaping, particularly in the lumbar area, the shell provides exceptional comfort even during long periods of sitting. A grip is integrated into the upper part of the backrest for easy handling.

High-quality materials and precise workmanship guarantee easy maintenance and long service life.

Maintenance

Surfaces can be maintained with common cleaning agents, with the exception of aggressive cleaners, detergents, polishes, and products containing granules and sand. Do not expose the chair to excessive moisture or running water or to temperatures above 90 °C.
